

Capability Profile

Confidential specialist support for universities, academic journals, and research institutions across the MENA region.

SPECIALIST SYSTEMS

QS | THE | Shanghai / ARWU

Scopus | Web of Science | Q4 -> Q1 development

ANONYMIZED ENGAGEMENTS | BILINGUAL DELIVERY | EVIDENCE-LED IMPROVEMENT

A DISCREET SPECIALIST COLLECTIVE

Senior expertise without public personal profiles.

Academia Smart Firm supports institutions through a confidential multidisciplinary collective. We present capabilities, methods, and deliverables rather than personal identities, protecting both specialists and clients.

RANKING INTELLIGENCE

QS, THE, and Shanghai/ARWU methodology, data governance, benchmarking, and executive monitoring.

JOURNAL DEVELOPMENT

Scopus and Web of Science evaluation, editorial governance, ethics, metadata, visibility, and quartile development.

RESEARCH VISIBILITY

Bibliometrics, citation analysis, publication strategy, international collaboration, and discoverability.

BILINGUAL DELIVERY

Arabic and English facilitation, scientific editing, institutional workshops, and stakeholder alignment.

CONFIDENTIALITY PRINCIPLE

Names, employers, client identities, and individual biographies are not published. Engagement profiles are anonymized by design.

MODEL-SPECIFIC STRATEGY

One institution. Three ranking systems. Different strategic requirements.

ASF avoids generic ranking plans. Each engagement connects institutional priorities to the indicators, evidence, governance, and annual cycles used by the selected ranking systems.

QS

Reputation, citations, faculty-student indicators, employability, internationalization, sustainability, and data submission.

THE

Teaching, research environment, research quality, industry, international outlook, and evidence consistency.

Shanghai / ARWU

Research concentration, highly cited researchers, top-tier outputs, awards, and per-capita academic performance.

CORE DELIVERABLES

- Indicator-level diagnostic and competitor benchmarking
- Data ownership, validation, and evidence governance
- Executive KPI dashboard and annual improvement roadmap

SCOPUS AND WEB OF SCIENCE

Indexing readiness and Q4 -> Q1 development support.

Journal performance is a system: editorial quality, ethics, peer review, regularity, metadata, discoverability, international contribution, citations, and continuous monitoring must work together.

ANONYMIZED ENGAGEMENT PROFILE

Scopus-indexed journal: development from Q4 toward Q1

Mandate: connect editorial policy, citation benchmarking, international visibility, editor mentoring, and evidence files through a monitored development roadmap.

WHAT WE EXAMINE

- Editorial governance, peer review, ethics, authorship, and policy alignment
- Publication regularity, metadata, DOI and reference quality, and production standards
- Citation performance, discoverability, international authorship, and quartile benchmarking
- Evaluation preparation, evidence files, editor mentoring, and response support

IMPORTANT

ASF supports evidence-led progression. Indexing acceptance and quartile outcomes remain decisions of the relevant databases and cannot be guaranteed.

FROM DIAGNOSTIC TO HANDOVER

Work that remains useful after the engagement ends.

Every engagement is designed around clear evidence, accountable ownership, practical tools, capability transfer, and measurable review cycles.

Diagnose

Review current performance, policies, data, evidence, and readiness.

Align

Set priorities, ownership, milestones, risks, and practical KPIs.

Deliver

Implement, mentor, monitor, refine, and transfer internal capability.

STANDARD ENGAGEMENT OUTPUTS

- Evidence-based diagnostic and prioritized gap analysis
- Roadmap with milestones, owners, dependencies, and decision points
- Governance structure, working templates, and evidence standards
- Executive dashboard for indicators, risks, and annual progress
- Mentoring, handover, and internal capability development
